

Designmyhat.com.au

you dream it, I'll build it!

A School Project that every student can participate in!

* Yes we are an official NSW government Department of Education's valued supplier

Looking for school project that the whole school can participate in, yes every student can enter into.

Download the template from our website and copy off the template and give each entrant a copy and let there minds go wild in designing a new flat brim for their school

Let them feel very proud and encourage them to participate and encourage there drawing skills in designing a new hat for their school

Make it a competition! Invite prominent community leaders to be final judges in the competition.

The winner (student designer) will have their name on the inner care label (This Hat was designed by:)

The above hat was designed by a student at Farmborough Public School in NSW.

Once you have chosen a winner, email the winning entry through to us and we will have our skilled designers digitise the final drawing ready for your approval and make production ready. We can then give you economical costs based on the quantities you may require. We can put an inner label on the inside of the cap that will inform you on how to launder and a space to write in who the cap belongs too in case of lost & found

Remember the caps are fully custom made from scratch so you can have any colour ways, any sizes (yes pre-primary kids) and you can decorate on any square centimeter of the cap.

If you are unsure how this works please contact us 07 5455 6297

We have people that can walk you through the project, lets bring some fun back into your school and engage everyone in this.
